5 2. Exploratory Data Analysis(EDA)

5.1 2.1 Univariate Analysis

As we only have Continous varibles in our Data.

In Univariate Analysis we need to understand Central Tendency and Spread of Data/Measure of Dispersion, for visualization we can use Histogram Plot and Box Plot.

To measure Central Tendency and Dispersion we have serval method some are Mean, Median,

Mode and Range, IQR(Inter Quartile Range), Standard Deviation, Varience etc.

```
[3]: print(f'Size of the data is: {df.shape}')
    Size of the data is: (25, 2)
[4]: print(f'Type and distribution of Data is: ')
    df.info()
    Type and distribution of Data is:
    <class 'pandas.core.frame.DataFrame'>
    RangeIndex: 25 entries, 0 to 24
    Data columns (total 2 columns):
         Column Non-Null Count Dtype
         -----
     0
         Hours
                 25 non-null
                                 float64
     1
         Scores 25 non-null
                                 int64
    dtypes: float64(1), int64(1)
    memory usage: 528.0 bytes
[5]: # Null values
    print(f' Sum of Null values in Data:')
    df.isnull().sum()
     Sum of Null values in Data:
